PRESSURE VESSELS & HEAT EXCHANGERS
## with ITP and MDR

CUTE INFOCOMM

cuteQualityManager for Piping is an Unique Software to manage the entire QA Activities and documentation

Why Choose cuteQM?

cuteQM is a specialized software solution to manage all the QA activities while fabricating pressure vessels and heat exchangers

ITP, material inspection, RFI/AFI inspection management, Welder Lot, NDT and all report generation and documentation will be much easier with templates.

One-Click Final Documentation

✓ Effortless Documentation
Easily generate final documentation and track missing documents as your project progresses.

✓ Paperless Efficiency
Eliminate paperwork, save time, and receive equipment calibration data with reminders.

✓ One-Click MDR
Turns one month of MDR preparation work into just a few days! Keeps track of missing documents.

✓ Instant Inspections
Conduct inspections instantly with mobile apps. Generate immediate reports with digital signatures support.

Key Features

- Manage PQR, WPS, Welders and WPQ
- Inspection Test Plan
- Welder Log & Welder Traceability
- Material Inward Inspection
- Defect Analysis
- Auto upload of signed documents

- User Customizable Interactive Dashboard
- Fitup / Weld Visual
- NDT Reports
- Punch List monitoring
- Surveillance reporting
- Manage NCR
- Status Reports
- KPI for welders & project
