

TESTIMONIAL

For

"CUTECH INFOCOMM SOLUTIONS PTE LTD"

We (**MUHIBBAH ENGINEERING (M) BHD, MALAYSIA**) have been working with "**CUTECH INFOCOMM SOLUTIONS PTE LTD**", **Singapore**, using their "**CuteQM Welding Software**" since 2020, on several Oil & Gas projects.

CuteQM Welding software is designed to record, integrate, centralize information required to manage the various discipline activities of the project and to provide instant information / reports, which helps to run the Project Quality Documentation smoothly and to submit the Project final documentation in time.

In the past, when we were using the conventional methods to prepare the 'Inspection Reports', we faced endless issues in completing the Project final documentation, resulting in dissatisfaction of the Clients at times which lead to time and cost related issues. Some of the key issues which we faced in the conventional method are as follows:

- *Delay in preparing reports even after completing the project.*
- *Error in typing Material / Heat no. / WPS No. / Welder No. etc.*
- *Prepared reports/data deleted from PCs due to various reasons.*
- *Summary data were not available for 'Completion / balance / backlog joints for Welding & NDT, Pipe Spool Release, Pipe Spool Painting etc.'*
- *Delay in preparing the 'WSS, Weld Repair %' and 'Welder Performance'.*

After evaluating few software, we have decided to use CuteQM Welding software in our company because of their professional approach and willingness to make any changes in the software templates as required by various clients.

Issues highlighted above were eliminated when we started using the CuteQM software. Their team's expertise and professionalism were evident throughout the project/s.

We have already completed FOUR projects (for Petrofac, Petronas and ExxonMobil) with CuteQM software and are delighted with their services.

Their team have shown enormous skill & vast domain knowledge and their IT expertise is reliable and trustworthy. Their team have worked closely with us throughout the project duration, staying on task and on target. They are open minded to make any

modifications / additional facilities at any time to meet our Client requirements. We also appreciate their quick and courteous responses. Their team have always answered our team's emails / WhatsApp group messages immediately, interacted / called our team proactively to resolve issues.

Today, by using this software, we are in a position to prepare & handover the required documentations during Load out of the Jacket & Topsides Structures and also submit the Final documentation within a short period of time after Load out.

We take this moment to thank Cotech for the services provided by their team. It is an absolute pleasure to work with Cotech. Job well done and we hope to continue to work together.

We appreciate Cotech's professionalism, promptness, quality of work, IT expertise, reasonable price and would highly recommend the CuteQM welding software and other services of Cotech to other agencies. Anyone seeking a reference can call us anytime and we will be happy to provide insights on Cotech and their good software CuteQM.

We wish all success for Cotech on their future endeavors.

Truly,

For

MUHIBBAH ENGINEERING (M) BHD,

DR. SEKAR GOPAL,
HEAD OF CORPORATE QA/QC DEPARTMENT.
